

ERGONOMIC HANDLING

Innovative solutions *for* — ergonomics at work

On gagne tous
au **meilleu**r-être au travail.

HappyManut
ergonomic solutions

On gagne tous au **meilleu**r-être au travail.

For over 25 years, I have worked alongside professionals in demanding sectors, where physical constraints, strict hygiene and a sustained pace are part of daily life.

This field experience convinced me of one thing: by rethinking working conditions, we protect people and sustainably strengthen businesses. This vision is what drives every solution implemented by Happymanut.

At Happymanut, we operate on a simple principle: human life is our most precious asset. Protecting the body, preserving health, improving everyday life—that's our mission.

For too long, workers have had to adapt to machines.

We make the opposite choice: adapt the machine to the human.

Our commitment focuses on demanding sectors:

food industry, food trades, as well as pharmaceutical and hospital environments.

These areas are heavily affected by musculoskeletal disorders, repetitive handling and work stoppages.

This observation is the driving force behind our action.

Because behind every statistic, there are women and men whose health is at stake.

We are taking action to make movements safer, reduce strain and put ergonomics back at the heart of processes. ”

Jean-Luc Ruel

HAPPYMANUT, YOUR PARTNER FOR BETTER WELL-BEING AT WORK

Ergonomic, sustainable and human solutions

At Happymanut, we firmly believe that **"prevention is better than cure."** For years, we've been redefining the standards of handling in demanding technical environments by putting people and their well-being at the heart of every solution.

A French, human-focused family business, Happymanut designs, manufactures, and installs robust stainless steel solutions. Sensitive to ergonomic issues and the importance of building trusting human relationships, we work to offer systems that meet the demands of the most demanding industrial environments while improving working conditions.

Well-being at the heart of our solutions

As a driver of both safety and performance, well-being is our top priority.

Explicit and human, our vision is at the heart of our signature: "We all benefit from well-being at work."

More comfort for employees, fewer risks to their health, fewer work accidents.

Every employee deserves a healthy and suitable work environment. In turn, this means better productivity for your business.

More comfort for employees

A better working environment

Tailor-made, just for you

Our commitment: to go further, alongside you, to design solutions that sustainably improve safety and productivity.

Well-being also comes from our customer relationships. At Happymanut, we don't just sell you a product. We ensure the relevance of our intervention by offering you alternatives that create real added value:

- ⊕ **A personalized approach**
Each project is studied with precision to offer a solution perfectly adapted to your needs and your environment.
- ⊕ **Proven expertise**
Our stainless steel equipment is designed to withstand the most demanding industrial environments.
- ⊕ **Delivery and commissioning solutions**
Optionally, possible training of teams to ensure optimal handling.
- ⊕ **Throughout your project, we remain at the service of well-being at work** with one goal in mind: increase your company's productivity, while ensuring the safety and well-being of your teams.

The keys *to our approach*

Our tailor-made approach is based on 4 key values which guide our commitments and our solutions:

#1 Adaptability

Because each work environment is unique, we adapt our handling solutions to the constraints of your sector.

#2 Expertise

Our know-how is based on years of experience and the use of high-quality materials, such as stainless steel.

#3 Human

Our teams share a common desire: to contribute to the development of employees through suitable ergonomic equipment.

#4 Proximity

We work closely with you to understand your needs and co-construct effective and sustainable solutions.

WHY CHOOSE HAPPYMANUT ?

1

Invest in well-being for performance

Choosing Happymanut means investing in a solution that benefits your business and your employees:

- ⊕ **Robust** and **durable** stainless steel equipment.
- ⊕ A reduction in the **risks of MSDs** and **work accidents**.
- ⊕ Productivity gains through handling optimisation.
- ⊕ Better collaborator satisfaction and loyalty.

Together, let's build a safer, more ergonomic working environment and more efficient.

2

Safety, productivity, well-being: measurable results

With Happymanut, choose long-term efficiency. Our ergonomic equipment not only improves the working conditions of your teams, but also contributes to the overall performance of your business.

Reduction of work accidents

50% of accidents are related to manual handling. Thanks to our ergonomic solutions, you can significantly reduce these risks.

Reduced absenteeism

Effective ergonomic solutions reduce absenteeism caused by chronic pain or musculoskeletal disorders.

Increased productivity

Our equipment allows your teams to work in ideal conditions, which directly promotes the overall performance of the company.

3

A proven methodology in 4 steps

Analysis of your needs

Each project begins with a detailed analysis of your constraints and objectives. We explore your work environment and establish precise specifications.

Personalized proposals

We select the most relevant ergonomic solutions, taking into account your technical, ergonomic and budgetary requirements.

Design and manufacturing

Our stainless steel equipment is designed to meet your exact expectations and fit perfectly into your environment.

Delivery and support

We take care of delivery and, if necessary, we train your teams to ensure optimal handling.

4

Happymanut transforms your needs in sustainable solutions

Our solutions aren't just designed to meet your immediate needs. They're designed to be durable and perfectly tailored to your specific requirements. We provide post-installation support for each project and are available to adjust our equipment as needed.

With Happymanut, choose robust, reliable, and human solutions. For safer, happier, and more productive teams.

As an expert and solid partner, Happymanut supports you and helps you create a safe and ergonomic working environment, conducive to the sustainable performance and well-being of your employees.

Because we all benefit from well-being at work.

ELECTRIC STAINLESS STEEL MOBILE LIFTERS **HAPPYLIFT**

HAPPYLIFT100

Our HAPPYLIFT100 range of handling trolleys is designed to handle loads of up to 100 kg. Equipped with a remote control and extremely manoeuvrable, these trolleys offer several customizable mast heights and bases, making it easy to lift and safely handle various types of loads. They are particularly suitable for demanding environments, guaranteeing reliability and compliance with hygiene standards.

Packaging in reusable containers, how to integrate ergonomics?

The elimination of plastic in catering is a major topical issue. Following the EGALIM and AGECE laws, we sought solutions for handling and ergonomics in collective catering.

The use of reusable containers such as stainless steel or glass increases musculoskeletal loads and disorders.

To address this, we have developed handling assistance solutions, including a new modular packaging line.

Stainless steel lid presser HAPPYCONDIPRESSE

This lid pressing device is a machine designed to close different types of containers. The variable adjustment of the position of the upper roller allows the closing of containers of different heights.

Métropole

**HAPPYCUVAMO
SILGOM**

The equipment offered fully addresses the major challenges of MSD in industry. The manufacturing is high-quality, as is the reliability. A large proportion of the kitchen staff are currently satisfied with the equipment that HAPPYMANUT has provided us.

David DAILLON,
Director of SIVU
COCLICO

When it comes to ergonomics in school catering, the biggest challenge lies in prevention. Corrective ergonomics still needs to be strengthened, and HAPPYMANUT is supporting us by offering innovative equipment that allows for better adaptation to work for many employees, some of whom have multiple medical restrictions. It also ensures fair treatment for the distribution of tasks.

Hardware solutions related to the prevention of MSDs are very efficient and meet the expectations of users who find comfort in their work and a reduction in physical stress.
